

## Freedom

The Plants are the cause for many of these wars

Though these live Plants are symbiots of ours

A gateway test with legality as the drug

Revealing whom will stay in line, do as they say

The individuals whom are willing to break their rules

are more easily spotted, rooted out, and left to rot

5- 40 years with anger, anal rape, and no breathing room,

for they find the crime of growing flowering plants

too alluring when supply is low and demand is ever - rising

Raw drug prohibition drives prices nearer that of noble metals

and we pay because drugs allow life to be a whole lot better

Now, medicine is always expensive, whether you pay for the pill or the plant

but it never needed to be, because all that you need is light, water, and nutritious soil

Opium, Cannabis, and Coca top long lists of controlled natural substances

Now abundant I.V.s, sprays, and easy - swallow synthetic hybrid derivatives

The problem with society is people's self - centered thinking and poor decisions

Capitalism, Communism, tyranny, hatred, and fear among others

All - consuming devils and desserts, distant lands alike

We are all the same in so many separate ways

laugh, lie, sing, praise, hide, sleep, and dramatize

We love....exhibiting our power over one - another

attention seeking from Mommy, fathers, siblings, and substitutes

Quit whining and Wake Up, because you are being royally fucked

Nearly Prima Nocte all over again, except, upon birth we all get fucked

One cannot patent an un-hybridized plant, so for profit, control, and a sustainable industry, Agencies of your Government devised prohibition

They cornered the market, contracted scientific studies, contrived truth, devised synthetic processes, and sold their products back to you at a affordable prices

The war against drugs is waged on you, the people, and your access to choose simple and effective medicine

This war has claimed more civilian lives and minds than any other, and maintaining this fight is of the highest priority for our world - wide military

Over 60,000 are dead in Mexico from the cartel battles, half of all our federal taxes are being spent in the middle eastern military actions, killing Arabs and claiming the expanse of Afghan Poppy fields.

Cannabis continues to be the butt of weak - minded joking, political bullshit, and unjust arrests and seizures, rather than being a medicinal, nutritional, and industrial saving grace for us in these scary times

Now, it is even illegal to harvest your own rain water - and soon to be food - without expressive permission from some Beaurocracy

WARNING- They will end your life with ease if crossed, so paint your disdain with anonymity. Paint your disdain with anonymity.

We Live in the Land of the Free, where They have a Law for Everything.
